Importing TAL U-NO-LX Presets

To install these presets into TAL U-NO-LX's preset browser:

1. Open TAL U-NO-LX in your DAW.
2. Click the preset **drop-down menu** in the top-left corner of the plugin.
3. Select **Show Presets Folder...** from the list.
4. In the folder that opens, drag in the folder named after the pack (e.g. Cornerstone) that contains the .pjunoxl files.

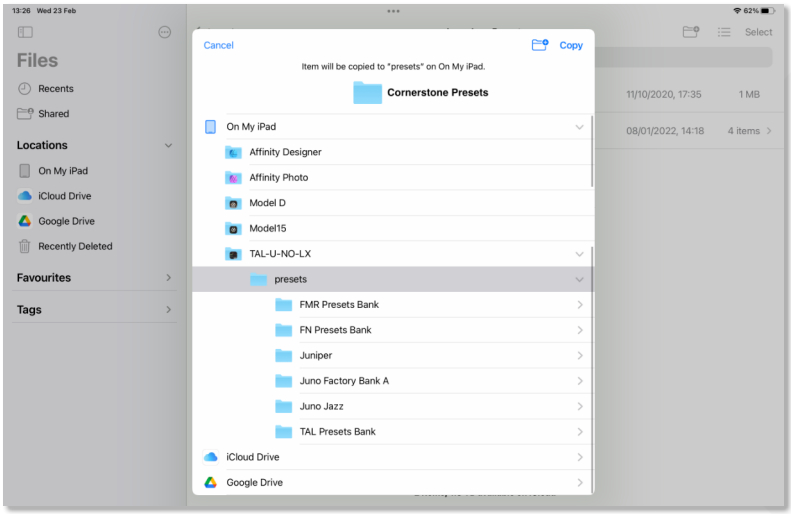

Importing on iOS / iPad

To install the presets on the iPad version of TAL U-NO-LX:

1. Open the Files app.
2. Locate the downloaded pack folder (e.g. Cornerstone).
3. Move the entire folder into: **On My iPad > TAL U-NO-LX > presets**

The presets will now appear inside the plugin's preset browser.

Troubleshooting

If you have issues loading the patches, make sure your plugin is updated to the latest version. You can download the latest version from the official TAL Software website.
